

THC® NITRO+[®]

STABILISED ORGANIC NITROGEN

N 15% + HUMIC ACID

A Powerful Nitrogen Synergist

Nitrogen (N) plays major part in protein synthesis and in the energy metabolism, which is essential for the development of the plant.

Nitrogen is also an essential nutritional major element for improving the juice production.

NITRO+ can be used for treatment nutrient deficiency and as a supplementary nutrient to stimulate growth.

NITRO+ treats interveinal chlorosis caused by nitrogen deficiency.

The liquid can be directly absorbed by the plant and improves vegetative growth.

Use THC NITRO+ if you want explosive fast growth, greener green and increased nutrient uptake!

BENEFITS: THC NITRO+ is a powerful nitrogen synergist.

A combination of nitrogen and organic humates, which effectively addresses many of shortcomings of nitrogen in horticulture.

NITRO+ is held in root zone for much longer, resulting in maximum nitrogen utilisation and reduced leaching.

NITRO+ includes a potent carbon source to prevent nitrogen related carbon depletion.

NITRO+ humates improve medium structure, release locked up nutrients and promote soil microorganisms. The humic acid component improves the performance of all other applied nutrients.

APPLICATION: To be used as a powerful Nitrogen fertilizer to promote healthy improved growth development and in case of Nitrogen deficiency, and treat interveinal chlorosis caused by N deficiency in Agriculture, Horticulture and Viticulture.

Use 2ml per 1 Litre of water or nutrient solution.

THC NITRO+ concentrate is Australian made and owned and is available in 1,5,20,200 Litres and 1,000 Litre IBC.
