- ◆ Density: Adjustable
- ◆ Maintenance: Machine self-cleaning & Parts washable
- ◆ Warranty: 12 Months Using JCones

## HAND ROLLED CONES

Our hand rolled cones are made of light cigarette paper with an ultra-thin glue line. We only use food grade glue and high quality paper for all our cones and filters.

Beside the most popular Medium, King and Reefer cones, JCones also produces Party, B52, Super and even Mega size cones.

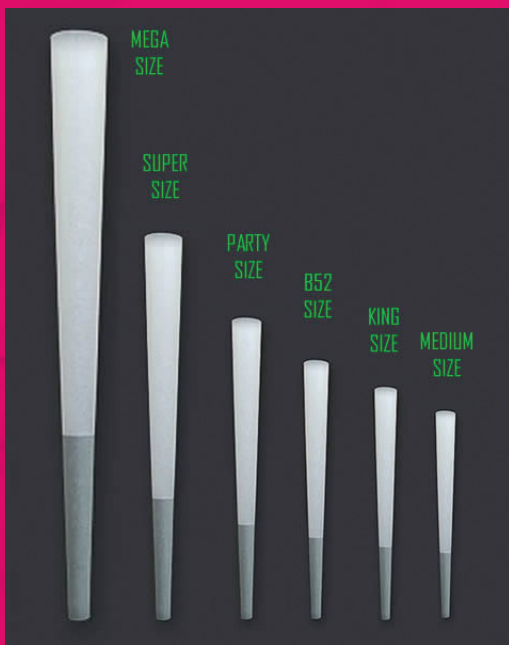

# PRE-ROLLED PAPERS

Our pre-rolled papers are made from the thinnest and most translucent cigarette paper. The ultra-thin glue line (0.5mm) is made from the highest quality food-grade glue. Their measurements and shape have been developed to perfectly meet the desires and requirements of coffee-shops and users alike and can be used best with the specially designed filling system from JCones as well with your existing filling equipment.

**JCones . . . keeps on rolling for you!!!**

Magnetic base allowing for unit stability

Two interchangeable heads: Herb head with ceramic chamber, isolated airpath and borosilicate mouthpiece

Wax head with titanium nail

# AERO

## DUAL CHAMBER CONVECTION

The Aero is a full convection device that houses dual heating chambers for twice as much vaping. With two stainless steel chambers, users can rotate the dial to switch from each individual chamber. The built-in high drain battery provides longer vape time but is easy to charge with the included charging cable. A ceramic heating core and separated airpath make vaping with this device exceptionally clean. The zirconia mouthpiece helps cool the vapor and ensure the purest taste possible. With the OLED display users can set their desired temperature. Haptic feedback for when the unit is on/off and reaches desired temperature. The pre-set session timer is also displayed allowing users to see how much time they have left in the current session.

### AERO FEATURES:

Dual chambers

5-minute session timer

Ceramic heating core

Isolated airflow

Full Zirconia Mouthpiece

Built-in 21700 4,800mAh high drain battery

OLED display features temperature range from 320F to 464F (160C to 240 C)
